

Supervisor's statement of a final thesis

Supervisor: Ing. Ondřej Guth, Ph.D.
Student: Mykhailo Liutov
Thesis title: Application for finding travel companions
Branch / specialization: Web and Software Engineering
Created on: 16 May 2022

Evaluation criteria

1. Fulfillment of the assignment

- ▶ [1] assignment fulfilled
- [2] assignment fulfilled with minor objections
- [3] assignment fulfilled with major objections
- [4] assignment not fulfilled

All the points of the assignment have been met. The project topics is student's idea.

2. Main written part 99/100 (A)

All the parts of the BT are contentful and necessary. There are no inaccuracies. The logical structure and flow work (analysis with research on existing solutions, design, implementation, testing); I appreciate that with every decision alternatives are discussed. The text is very well written, is comprehensible, does not contain severe typographic mistakes, and uses appropriate language. The student shows the skill in using information sources.

3. Non-written part, attachments 100/100 (A)

The software made as a result of this thesis is working and meets the assignment. It consists of a backend deployed to a cloud provider (AWS) and a mobile client. Source code is reasonably structured, maintainable and readable.

4. Evaluation of results, publication outputs and awards 100/100 (A)

Both client and server part may be used by real users in current state. Deployment in a cloud provided environment makes its use in real-world scenario even better.

5. Activity of the student

- ▶ [1] excellent activity
- [2] very good activity
- [3] average activity
- [4] weaker, but still sufficient activity
- [5] insufficient activity

The student worked hard from the beginning. Our consultations were arranged quite regularly and the student was always well prepared.

6. Self-reliance of the student

- ▶ [1] excellent self-reliance
- [2] very good self-reliance
- [3] average self-reliance
- [4] weaker, but still sufficient self-reliance
- [5] insufficient self-reliance

The student continuously came up with own ideas and definitely shown ability to develop independent creative work.

The overall evaluation

99 /100 (A)

The student proved to be a hard worker with skills to design and implement software in very good quality (the application can be used in current state).

Instructions

Fulfillment of the assignment

Assess whether the submitted FT defines the objectives sufficiently and in line with the assignment; whether the objectives are formulated correctly and fulfilled sufficiently. In the comment, specify the points of the assignment that have not been met, assess the severity, impact, and, if appropriate, also the cause of the deficiencies. If the assignment differs substantially from the standards for the FT or if the student has developed the FT beyond the assignment, describe the way it got reflected on the quality of the assignment's fulfilment and the way it affected your final evaluation.

Main written part

Evaluate whether the extent of the FT is adequate to its content and scope: are all the parts of the FT contentful and necessary? Next, consider whether the submitted FT is actually correct – are there factual errors or inaccuracies?

Evaluate the logical structure of the FT, the thematic flow between chapters and whether the text is comprehensible to the reader. Assess whether the formal notations in the FT are used correctly. Assess the typographic and language aspects of the FT, follow the Dean's Directive No. 52/2021, Art. 3.

Evaluate whether the relevant sources are properly used, quoted and cited. Verify that all quotes are properly distinguished from the results achieved in the FT, thus, that the citation ethics has not been violated and that the citations are complete and in accordance with citation practices and standards. Finally, evaluate whether the software and other copyrighted works have been used in accordance with their license terms.

Non-written part, attachments

Depending on the nature of the FT, comment on the non-written part of the thesis. For example: SW work – the overall quality of the program. Is the technology used (from the development to deployment) suitable and adequate? HW – functional sample. Evaluate the technology and tools used. Research and experimental work – repeatability of the experiment.

Evaluation of results, publication outputs and awards

Depending on the nature of the thesis, estimate whether the thesis results could be deployed in practice; alternatively, evaluate whether the results of the FT extend the already published/known results or whether they bring in completely new findings.

Activity of the student

From your experience with the course of the work on the thesis and its outcome, review the student's activity while working on the thesis, his/her punctuality when meeting the deadlines and whether he/she consulted you as he/she went along and also, whether he/she was well prepared for these consultations.

Self-reliance of the student

From your experience with the course of the work on the thesis and its outcome, assess the student's ability to develop independent creative work.

The overall evaluation

Summarize which of the aspects of the FT affected your grading process the most. The overall grade does not need to be an arithmetic mean (or other value) calculated from the evaluation in the previous criteria. Generally, a well-fulfilled assignment is assessed by grade A.
