### III. OVERALL EVALUATION, QUESTIONS FOR THE PRESENTATION AND DEFENSE OF THE THESIS, SUGGESTED GRADE

*The diploma thesis was devoted to the topic - Airlines Decision on Aircraft Parking in Covid-19 Crisis.*

*I consider the chosen topic of the diploma thesis to be highly topical. The author dealt with the theoretical background, which needed to be processed and thus creates a precondition for successful processing of the analysis of the above-mentioned topic. The work also defines the basic results of theoretical research in the field of aircraft parking and maintenance. The author also described the legislative framework for maintaining the airworthiness of aircraft within the European Union.*

*I consider the chosen methodology for solving the set problem to be adequate. The description of aircraft parking at selected airlines is one of the benefits of the thesis. The proposed model of the decision-making process of airlines regarding aircraft parking is sufficient. The author rightly states that variables that do not have to be published publicly enter the overall decision-making process. The fact that it is not possible to verify the correctness of the model at a sufficient level is only a direct consequence of the above-mentioned facts. A flowchart would help improve the clarity of the model*

*The work contains a sufficient number of sources, which are adequately cited in the work. The division of the text into chapters and subchapters is sufficient. The readability of the work is at a good level, despite occasional grammatical or syntactic errors. The author fulfilled the goal of the thesis set out in the assignment of the final thesis.*

The grade that I award for the thesis is **A - excellent**.
