by self-study and from professional literature..... B (very good) ... 1,5

Usage of groundwork and data from practice..... A (excellent) ... 1,0

Professional level and contribution of the master's thesis..... B (very good) ... 1,5

Formal aspects of the master's thesis ..... B (very good) ... 1,5

Further comments to the master's thesis:

The thesis focuses on an important topic in the automotive industry. The thesis includes a literature review, a driving simulator experiment and data analysis. Overall, it is well written and meets its goals, although some parts and formulations are challenging to read. The author could have communicated better with his supervisors, which would ensure a smooth writing process.

I **recommend** the master's thesis for the defence.

**Summary classification of the master's thesis ..... B (very good) ... 1,5**

doc. Ing. Petr Bouchner, Ph.D.
