

## Seznam patentů

### Kverneland

- US10973164 – Seed meter
- EP2862431 B1 – Dosing equipment for dosing bulk material
- EP2476302 B1 – Metering wheel for a metering device for dosing seed
- EP2468084 B1 – Dosing equipment for dosing seeds
- EP1759568 B1 – Pneumatic seed and/or fertilizer distributor
- JP2004290116 A – Fertilizing apparatus for paddy field working machine

### Lemken

- EP4145975 A1 – Metering device for an agricultural machine
- EP4145974 A1 – Metering device for an agricultural machine
- EP3662731 B1 – Machine for spreading granular solids with a pneumatic conveying system
- EP3051938 B1 – Agricultural distribution machine with a metering system

### Väderstad

- EP342828 A1 – Method for calibration of feed rate of a metering device
- EP3358930 A1 – Meter housing for feeding granular or powdered material
- EP23533355 A1 – Metering assembly for an air seeder
- EP2152615 A1 – Rotor for an outfeed house at a sowing machine

### Horsch

- DE102021133510 A1 – Agricultural distributor
- EP4165967 A1 – Dosing device, dosing system for agricultural distribution machine
- EP3918897 A1 – Dosing device, in particular for a drill
- EP3918900 A1 – Dosing device for dosing material
- DE102020114990 A1 – Dosing insert for insertion into a dosing housing
- EP3918898 A1 – Agricultural machine

- EP3918899 A1 – Dosing equipment for dosing bulk material
- DE102019122908 A1 – Dosing device, insert and receiving device for selectively receiving different inserts
- DE102019122911 A1 – Agricultural machine with freely selectable allocation of at least one working unit to at least one section
- EP3662733 A1 – Agricultural distribution machine and dosing device for agricultural distributor
- EP2932818 A1 – Distribution device and method for delivery of granular goods
