

## Bachelor thesis supervisor's review

**Bachelor thesis:** Possibilities of usage of Wind Power in the Republic of Kazakhstan

**Author:** Bc. Zhalgas Shogelbayev

**Thesis supervisor:** Msc. Ing. Ghaeth fandi

Rating (1 – 5)  
(1 = best; 5 = worst):

1. Fulfillment of assignment requirements:

1

2. Self-reliance and initiative during the thesis solution:

3

3. Systematic solutions of individual tasks:

2

4. Ability to apply knowledge and to use literature:

1

5. Collaboration and consultations with the thesis supervisor:

3

6. Thesis formal and language level:

1

7. Thesis readability and structuring:

1

8. Thesis professional level:

2

9. Conclusions and their formulation:

3

10. Final mark evaluation (A, B, C, D, E, F):

B

verbal:

### Brief summary evaluation of the thesis (compulsory):

This work describe the possibilities of usage of wind power in Kazakhstan. The student talks about the overall review of the theoretical, technical and economical aspect of usage of wind energy in the country. But the technical aspect of the work is not too satisfactory due to the student inability to always consult.

This work actually presents the possibilities of development of wind power energy in Kazakhstan, which the government of the country should implement for her overall development.
