SUPERVISOR’S REPORT ON THE MASTER’S THESIS

Master's thesis title .................................. Sound module for interactive vehicle simulators
Author (including degrees) .................. Bc. Matúš Lorinc
Master's thesis supervisor (incl. deg.) ...... doc. Ing. Petr Bouchner, Ph.D.
                                          doc. Ing. Stanislav Novotný, Ph.D.

Evaluation criteria and their classification
Fulfilment of the master’s thesis requirements and goals.......... D (satisfactory) ... 2,5
Self-action and own initiative
during the master's thesis elaboration........................................ C (good) ... 2,0
Application of knowledge gained
by self-study and from professional literature......................... C (good) ... 2,0
Usage of groundwork and data from practice.......................... C (good) ... 2,0
Professional level and contribution of the master’s thesis........B (very good) ... 1,5
Formal aspects of the master’s thesis................................. B (very good) ... 1,5

Further comments to the master’s thesis:
The overall level of the thesis is good. Text is logically edited, easy to read, accompanied with figures, diagrams and pictures. On one hand the extent of the thesis is quite large but on the other hand it contains a lot of information generally available (sound generation theory) at the expanses of the practical part. Main reason for lowered classification is in the weaker realization of the sound system and its expected implementation into the simulator system.

I recommend the master’s thesis for the defence.

Summary classification of the master’s thesis .................. C (good) ... 2,0
