II. Oral Evaluation

Basis for evaluation of individual criteria (required, ¼ - ½ page):

The submitted task was focused on design of an apartment building.

Formal and graphical level of submitted thesis is poor. The work contains a considerable amount of errors both in the technical drawings of structures and the use of technical terminology.

The clarity of thesis is worse, there is not a clear link various parts drawing project documentation - detail D1 does not match the section A-A, missing detail staircase, etc.

Student consulted unregularly. For consultations doesn't come with any variants of solutions over which we could be conducted and discussed. and on that basic he would have chosen the best solution. Passively receives informations and interpretations of the solved problem.
