

MASTER THESIS : Evaluation and Awarding Marks

Technical masters

Name, first name	Betinsky, Michal
Topic	Investigation into the tire relaxation length behavior using FEM
Company	Continental Matador Rubber s.r.o.
Company representative	Vladimír Backo

Evaluation (for criteria cf. back of this sheet)

The Master thesis / Major Project will be assessed by the examiners assisted by an external expert, the company coach and the main supervisor. The names of the examiners will be made known to the Masters candidate when work on the thesis ends (after the last GO).

	Mark	Motivation
Knowledge and understanding C1: Analyzing and defining problems C5: Conducting Research Weight factor 1	5	Michal has knowledge of his topic, but misses the 'overall knowledge' to connect things that are related. In his research he shows not enough critical attitude.
Applying knowledge and understanding C2: Design C3: Testing C4: Managing work processes Weight factor 1	5.5	Related to the statements above: when applying his knowledge he could be more critical in evaluating his results: what do they mean? are they realistic? Also the design of the tests are to be discussed more critically
Making judgments C1: Analyzing and defining problems C2: Design C4: Managing work processes C5: Conducting Research Weight factor 1	5	A good explanation of the reasons behind choices is missing often. Time issues are delaying his research more than a critical attitude
Communication C1: Analyzing and defining problems C6: Communication and Collaboration Weight factor 1	6	Good communication in the project, but report, presentation and defense are minimal.
Learning Skills C7: Professional development Weight factor 1	6	Michal has to grow in his master level, he is learning to become more critical and reflective. He shows progress, but there is still a way to go.
Mark total	5.5	

Date : 12-3-2018

Signature examiner 1 : Saskia Monsma 

Signature examiner 2 : Karel Kural
