

## I. IDENTIFICATION DATA

<b>Thesis name:</b>	Forecast in Finance (ERP)
<b>Author's name:</b>	Victoria Eykhmann
<b>Type of thesis :</b>	bachelor
<b>Faculty/Institute:</b>	Faculty of Electrical Engineering (FEE)
<b>Department:</b>	Dept. of Computer Science
<b>Thesis supervisor:</b>	Miroslav Burša, Ing., PhD.
<b>Supervisor's department:</b>	CTU in Prague, CIIRC

## II. EVALUATION OF INDIVIDUAL CRITERIA

<b>Assignment</b>	ordinarily challenging
<i>Evaluation of thesis difficulty of assignment.</i>	
Visualization fronted based on existing work.	

<b>Satisfaction of assignment</b>	fulfilled
<i>Assess that handed thesis meets assignment. Present points of assignment that fell short or were extended. Try to assess importance, impact or cause of each shortcoming.</i>	
The application is reasonably working. The deadlines set at the beginning were met.	

<b>Activity and independence when creating final thesis</b>	A - excellent.
<i>Assess that student had positive approach, time limits were met, conception was regularly consulted and was well prepared for consultations. Assess student's ability to work independently.</i>	
The student met time limits and consulted weekly. Although not very communicative by (her) nature, the meetings were technical and concise.	

<b>Technical level</b>	B - very good.
<i>Assess level of thesis specialty, use of knowledge gained by study and by expert literature, use of sources and data gained by experience.</i>	
Student has used Java EE for implementation. Which means less code, but sometime more (hardly debuggable) problems. The code should be more commented.	

<b>Formal and language level, scope of thesis</b>	C - good.
<i>Assess correctness of usage of formal notation. Assess typographical and language arrangement of thesis.</i>	
I appreciate that the thesis is written in English. The English language should be improved.	

<b>Selection of sources, citation correctness</b>	A - excellent.
<i>Present your opinion to student's activity when obtaining and using study materials for thesis creation. Characterize selection of sources. Assess that student used all relevant sources. Verify that all used elements are correctly distinguished from own results and thoughts. Assess that citation ethics has not been breached and that all bibliographic citations are complete and in accordance with citation convention and standards.</i>	
This is an implementation bachelor's thesis. The sources used are appropriate.	

**Additional commentary and evaluation**

*Present your opinion to achieved primary goals of thesis, e.g. level of theoretical results, level and functionality of technical or software conception, publication performance, experimental dexterity etc.*

Student should get used to systematically test the SW (moreover when an enterprise-grade framework is used).

**III. OVERALL EVALUATION, QUESTIONS FOR DEFENSE, CLASSIFICATION SUGGESTION**

*The student worked actively on the thesis and was able to meet the deadlines. She actively solved problems found and consulted the functionality quite often. The work was also consulted (presented) to an external company with positive outcome.*

I evaluate handed thesis with classification grade B - very good.
