

Bachelor thesis supervisor's review

Master thesis: Low Carbon technology in the distribution network

Author: Nikola Miljkovic

Thesis supervisor: Ing. František Vybíralík, CSc.

Rating (1 – 5)
(1 = best; 5 = worst):

1. Fulfillment of assignment requirements:	<input type="text" value="1"/>
2. Self-reliance and initiative during the thesis solution:	<input type="text" value="1"/>
3. Systematic solutions of individual tasks:	<input type="text" value="1"/>
4. Ability to apply knowledge and to use literature:	<input type="text" value="2"/>
5. Collaboration and consultations with the thesis supervisor:	<input type="text" value="1"/>
6. Thesis formal and language level:	<input type="text" value="2"/>
7. Thesis readability and structuring:	<input type="text" value="1"/>
8. Thesis professional level:	<input type="text" value="1"/>
9. Conclusions and their formulation:	<input type="text" value="1"/>
10. Final mark evaluation (A, B, C, D, E, F):	<input type="text" value="A"/>
verbal:	excellent

Brief summary evaluation of the thesis (compulsory):

In Bachelor's thesis the student presents an overview of the types of renewable energy sources. The theoretical part of the work is focused to the principle of photovoltaic power plants. The student carried out a calculation of the impact of the new photovoltaic power plants into the LV distribution network. The work has a logical sequence of chapters and its graphical layout is good. Student worked on his task independently and initiatively throughout the period. He came to the consultations prepared and your questions were oriented to the subject of your thesis.

Recommendation to the defense:

I recommend

Notes:

- 1) The total thesis evaluation needn't be determined by the partial evaluations average.
- 2) The total evaluation (item 8) should be from the following scale:

excellent	very good	good	satisfactory	sufficient	insufficient
A	B	C	D	E	F
