

Supervisor's statement of a final thesis

Student:	Bc. Yevhen Kuzmovych
Supervisor:	Ing. Marek Šmíd, Ph.D.
Thesis title:	Multi-instrument Music Transcription
Branch of the study:	Knowledge Engineering

Date: 27. 1. 2020

Evaluation criterion:	The evaluation scale: 1 to 4.	
1. Fulfilment of the assignment	1 = assignment fulfilled,	
	<u>2</u> = assignment fulfilled with minor objections, 3 = assignment fulfilled with major objections,	
	4 = assignment not fulfilled	
	4 – ussignment not juljined	
Criteria description: Assess whether the submitted FT defines the objectives sufficiently and in line with the assignment; whe	ther the objectives are formulated correctly and fulfilled sufficiently.	
In the comment, specify the points of the assignment that have not been met, assess the severity, impact, and, if appropriate, also the cause of the deficiencies. If the assignment differs substantially from the standards for the FT or if the student has developed the FT beyond the assignment, describe the way it got reflected on the quality of the assignment's fulfilment and the way it affected your final evaluation.		
Comments:		
The FT objectives were clear. The research part was very extensive and beyond my expectations, on the other hand the		
testing part was shorter than expected. More tests and example outputs of the whole system would be useful.		
Evaluation criterion:	The evaluation scale: 0 to 100 points (grade A to F).	
2. Main written part		
2. Main written part	95 (A)	
Criteria description: Evaluate whether the extent of the ET is adequate to its content and scope; are all the parts of the ET co	ntentful and necessary? Next, consider whether the submitted ET is	
Evaluate whether the extent of the FT is adequate to its content and scope: are all the parts of the FT contentful and necessary? Next, consider whether the submitted FT is actually correct – are there factual errors or inaccuracies? Evaluate the logical structure of the FT, the thematic flow between chapters and whether the text is comprehensible to		
the reader. Assess whether the formal notations in the FT are used correctly. Assess the typographic and language aspects of the FT, follow the Dean's Directive No. 26/2017, Art. 3. Evaluate whether the relevant sources are properly used, quoted and cited. Verify that all quotes are properly distinguished from the results achieved in the FT, thus, that the		
citation ethics has not been violated and that the citations are complete and in accordance with citation copyrighted works have been used in accordance with their license terms.	practices and standards. Finally, evaluate whether the software and other	
Comments:		
The FT is well organized; formal, graphical, and notation aspects are good	Reasonable small amount of language errors	
present. It is easy to read. Citations are done correctly, list of references above expectations.		
present. It is easy to read. Citations are done correctly, list of references a	above expectations.

Activity and self-reliance of the 5. student

5a:

- 1 = excellent activity,
- 2 = very good activity,
- 3 = average activity, 4 = weaker, but still sufficient activity,
- 5 = insufficient activity
- 5b:
- 1 = excellent self-reliance,
- 2 = very good self-reliance,
- 3 = average self-reliance,
- 4 = weaker, but still sufficient self-reliance,
- 5 = insufficient self-reliance.

Criteria description:

From your experience with the course of the work on the thesis and its outcome, review the student's activity while working on the thesis, his/her punctuality when meeting the deadlines and whether he/she consulted you as he/she went along and also, whether he/she was well prepared for these consultations (5a). Assess the student's ability to develop independent creative work (5b).

Comments:

The student was punctual, reliable, self motivated, and creative.		
Evaluation criterion:	The evaluation scale: 0 to 100 points (grade A to F).	
6. The overall evaluation	90 (A)	
Criteria description:		

Summarize which of the aspects of the FT affected your grading process the most. The overall grade does not need to be an arithmetic mean (or other value) calculated from the evaluation in the previous criteria. Generally, a well-fulfilled assignment is assessed by grade A.

Comments:

The FT topic is interesting, the goals were appriopriate, and it was very well researched. The design and the contributions are good. Its only drawback is it would need a little more time spent on testing, which was probably caused by not perfect distribution of time usage, especially towards the end.
