Usage of groundwork and data from practice .................................................. B (very good) ... 1,5

Professional level and contribution of the master's thesis ................. B (very good) ... 1,5

Formal aspects of the master's thesis .................................................. B (very good) ... 1,5

Further comments to the master's thesis:

The thesis is part of the work in a much larger project. It is my believe that Michal has managed to draw conclusions, which are important both for research purposes and for the project's development. This has been done by performing a well-structured and systematic overview of the existing work, propose a framework for evaluation of CITSi-approaches, draw conclusions the sugested framework, analyse the proposed framework by following the suggested methodology and draw conclusions from the tests. The work is mainly refering to European projects and limited knowledge has been gained from articles and journals from the research area.
I recommend the master's thesis for the defence.

Summary classification of the master's thesis .............. B (very good) ... 1,5
