

KOS is likely (e.g., when using Firefox) to change the file type from “*NAME.zip.001*” to “*NAME.zip.pdf*”

The files are actually a multi-part zip as shown by the original filename.

Download the files, rename them to match the original and concatenate them:

```
$ cat F3-DP-2021-Manour-Simon-priloha-dvd.zip.* > priloha.zip
```

“*priloha.zip*” is the archive mirroring the DVD enclosed in the printed version of the thesis.
