Terrain of eternity

Václav Suchan

New columbarium design and
revitalization of an anteroom of the
Vinoř cemetery, Prague

0

1

introduction

„In the middle of a columbarium, we are in a sphere of death art. Funeral peace and something from a breath of sacral spirit have to cling on this building.“

EDGAR, Emil. Kolumbária a popelnicové háje. Nakladatelství Borský a Šulc. Praha, 1923.

Prague - Vinoř

Vinoř is a municipal district on the north-east edge of Prague. Former small agricultural village became an important part of Prague's outskirts with a residential character during the last century. Built-up area is created mostly by small family houses and vilas. Geomorphologically it lays on the Middle-Elbe tableland and it is rounded by Vnořský and Ctěnický streams.

Emblem and flag of the municipal district Prague-Vinoř [1,2]

[3]

in numbers

kadastral area: **599 ha**
 the highest point: **268 m**
 number of inhabitants: **4 071** (2019)
 number of houses: **752** (2011)
 first written mention: **1088**
 year of joining Prague: **1974**
 administrative ward: **Prague 9**

Vinoř in context of Czech Republic and Prague [4, 5]

Vinoř cemetery

- place of eternal rest unusually in the very centre of the municipality. why?

The graveyard in Vnoř was originally situated around the Church of Exaltation of Holy Cross which is located in the former centre of the district - on Vnoř square in the neighbourhood of the Vnoř castle. To the current location it was relocated on the end of 18th century when there was no housing as the place was on the edge of the village. Today's unusual situation of cemetery being a centre of the whole municipality is because the dynamic development during the 20th century (see History, page 22).

[6]

Graveyard and the Czernin tomb

The cemetery is 1,2 ha large, lays on a flat terrain and its surrounded by a small park, Mariapoli centre (catholic institute) and Mladoboleslavská street (main road going from Prague through Vnoř in direction Brandýs nad Labem). Its dominant is a classicistic Czernin tomb built between 1805-1841 located in the centre of the older part of it.

Administrator of the cemetery is Municipal district Prague-Vinoř.

The oldest grave is from the end of 19th century but burial ground was there already in the prehistoric times how archeological finds showed in the 1950s.

What was the assignment?

a/ design a new columbarium in an empty part (approx. 12 x 50 m) of the existing cemetery

b/ revitalize a park and surroundings in front of the main entrance to the cemetery

analysis

border relations

nature

routes and transportation

history

first written mention about Vinoř - king Vratislav II. gave village to Vyšehrad chapter

1088

chapels of Via Sancta - pilgrimage route from Prague to Stará Boleslav - were built, six of them in Vinoř

1690

baroque Church of the Exaltation of the Holy Cross by F. M. Kaňka was built

1728

the cemetery was relocated from the surroundings of the church to today's location

1805

first cremation of Vinoř inhabitant

1914

bombing of Prague outskirts on the end of WWII - 300 deads in Vinoř enlargement of the cemetery

1945

meeting of members of the secret anticommunist resistance movement (among others also Milada Horáková) on the Vinoř clergy house

1948

Vinoř was joined to Prague, dynamic housing development

1974

Original painting of the Via Sancta route chapel (Pakenská - the one next to the cemetery) [7]

Engraving of the Vinoř castle (end of 18th cent.) [8]

Postcard with a picture of the main road (formerly Pražská, today Mladoboleslavská st.) [9]

View of the pond Malá Obůrka and the elementary school next to the cemetery (1920s) [10]

Postcard with a photo of a Memorial of the victims of WWI in front of the main entrance to the cemetery (beg. of 20th cent.) [11]

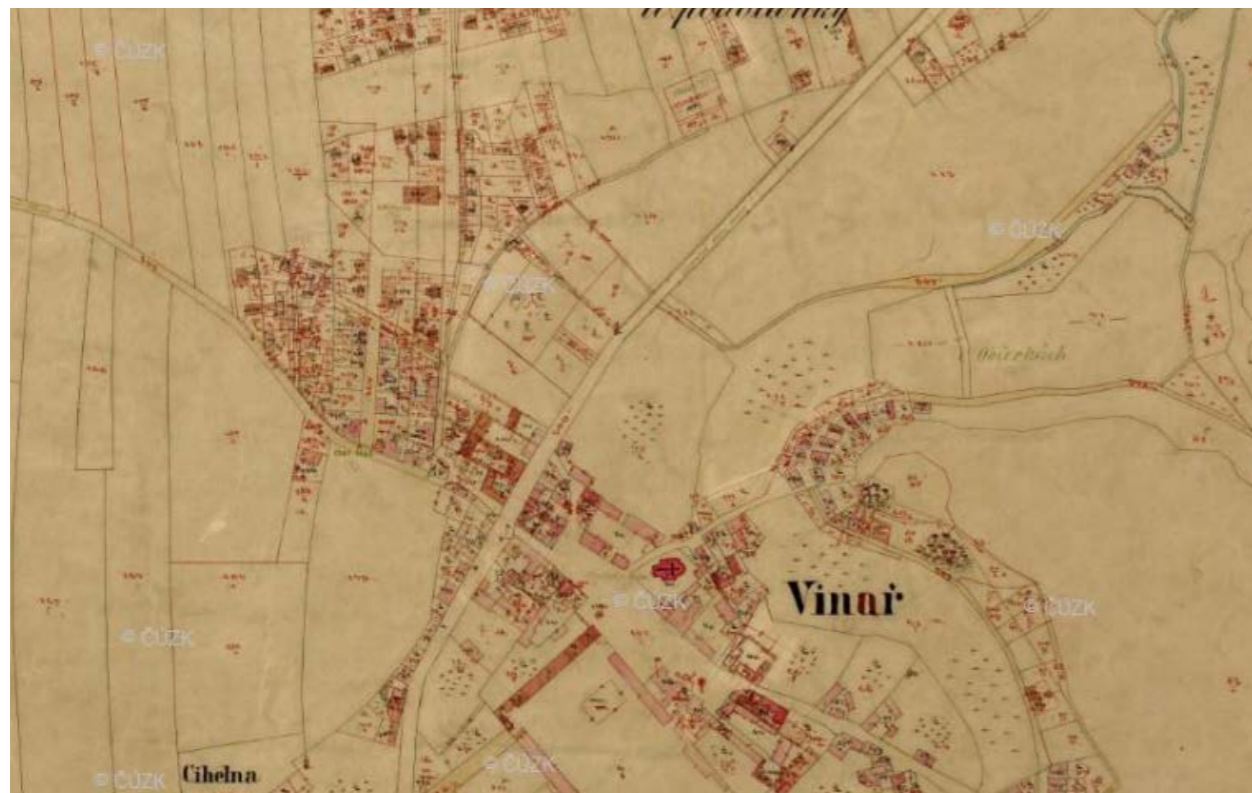

Aerial photo of Vinoř - still solitary (and also smaller) cemetery on the left side (1924) [12]

old maps

Stable cadastre (1841) - we can see newly replaced cemetery on the northern edge of the village [13]

Stable cadastre (around 1900) - Vinar is enlarging so new houses are built in the surroundings of the cemetery [14]

the site

Q

S

concept

Life is *repeating*. Verticals, horizontals, days, nights, joys, sorrows, loves, hates, births, deads. Life is *reflecting*. Gratuities, angers, indifferences, regrets. Life is *connecting*. People, knowledge, beliefs. Life is *layering*. Feelings, moments and remembrances. *Frames* which are bounding our memories.

The area is divided into two parts - bigger one /park in front of the cemetery/ and smaller one /space of columbarium/.

Both of them have their own atmospheres /lively, open, busy/ x /intimate, calm, enclosed/.

Both of them have their own *frames* created by vegetation (trees and climbing plants).

Both of them are *connected* by a transverse axis, materials and *reflexctions* of two water surfaces.

One of them is based on *layering*, the second one on *repeating*.

design

site plan

new columbarium

- _ 2 m high **columns made from corten**
- _ composition in a grid along a transverse axis
- _ gaps in the grid are used for placing benches and trees
- _ intimate atmosphere created also by a **climbing plants construction**

separated service space

- _ place for **dustbins and back area** of the cemetery service
- _ made from subtile corten wall
- _ from the side of the street serves also as a **notice board** for all local associations, groups, companies, clubs etc.

replaced bus stop (dir. Letňany)

- _ new location in front of the Norma shopping centre
- _ just **beside a future new square**
- _ same position as the stop from Letňany (opposite side of the street)

around the chapel

- _ creating a **dignified place** around this historic sight
- _ **narrowed road** allows to come to the chapel also from the front side
- _ informational panel about history in the paving

main axis

- _ fundamental compositional element of the site
- _ highlighted by a **wide strip of dark cobblestone paving**
- _ water feature

central area

- _ place for stopovers, meetings, entering the cemetery or just passing through
- _ gravel surface for an **easy water soaking**
- _ cutting down three yews which made this place dark and disorganized
- _ benches

linden alley

- _ completing an old alley with **4 more lindens**
- _ prolongation to the next side of the road - continuation to the parish garden
- _ potential **entrance to the parish garden** - to join it smoothly with cemetery and other places of greenery in Vnoř (Obůrka ponds, Vnořské náměstí, Vnořský park, Vnořský stream valley)

side entrance to the cemetery

place for dustbins and back area of a cemetery service; integrated notice boards

broadened pavement on the place of replaced bus stop

Mladoboleslavská st.

parking

broadened pavement with a cycle lane

around the Via Sancta chapel

anteroom of the cemetery

new columbarium

- _designed as a 109 **solitair columns**
- _material: **corten** 3 mm
- _composition in a grid along a transverse axis
- _gaps in the grid are used for placing benches and trees

_each column has three shelves (45 cm high) and it is possible to place up to five urns on each of it (when we count with the max. size of each urn Ø 20 cm (standard size is Ø 16-19 cm))

maximum capacity

- _109 columns
- _327 boxes
- _1635 urns

climbing plants construction

- _to amplify an intimate atmosphere and a feeling of being in a „room,“ steel construction for climbing plants is designed there
- _two 4 m high parts
- _visual enclosure of the space
- _passes through from each aisle of the columbarium

water feature

- _two basins on the opposite edges of the tranverse axis
- _“**bowl**“ on the side of columbarium
- _“**cube**“ in the park (on a crossing with main axis)
- _both of them with a calm surface and an overflow
- _material: corten

cross-section

sectional view

layout of columns

surfaces

[24]

dark granite cobble 7x7
_main axis + access paths to the central area + place around chapel

[25]

white granite cobble 5x5
_pavement in front of the side entrance to the cemetery + pavement along Mladoboleslavská st.

[26]

compacted gravel
_central area of the anteroom + columbarium
_easy water soaking to the soil

[27]

concrete
_entrances to the cemetery
_highlighting of them - contrast with the dark granite cobbles

vegetation

[28]

1 *Tilia platyphyllos*

- _completion and prolongation of the alley and the frame around the site
- _8 pieces

[29]

2 *Taxus baccata*

- _completion of the frame around the site
- _1 piece

[30]

3 *Betula pendula*

- _in the columbarium
- _soft, light, subtile character
- _2 pieces

mobiliar

columbarium

- _solid wood benches (producer: Street Life, model Drifter bench)
- _round benches around trees (producer: Streetpark; model Radiano LRA11 000)

[32]

[33]

anteroom

- _unified Prague mobilier from IPR (benches, waste bins, cycle stands)
- _designed by Olgoj Chorchoj studio
