

EVALUATION OF THE SUPERVISOR

Student : **Bc. Petr Royt**

Subject of the diploma work : Návrh zpřesnění výpočtu měřicích bodů hladinového palivoměru osobního automobilu.
Accuracy enhancement of the fuel level sensor checkpoints.

Consultant : **RNDr. Jiří Kalčík, CSc.**

1) Topic assignment and fulfilment thereof :

The student has completed all the diploma work assignments

2) Evaluation of the student attitude and the contents of the diploma work:

The subject significantly enhanced standard knowledge of a student of Material Engineering. Petr Royt had to master new topics and apply them actively when preparing his diploma work. When working on the diploma project he showed good motivation and responsibility. The presented diploma work contains both the theoretical background of the principle of the fuel level sensor and also practical material analysis. Based on results of these analyses and statistical evaluation of the production process he has proposed a practical improvement of the fuel level construction.

3) The diploma thesis recommended to defence and is recommended for classification by the degree A
