### **Further comments to the master's thesis:**

Barbora has spent much effort in designing a tool to evaluate options for different operating rules in a warehouse. A lot of data has been handled, and as the operation as such is not a subject with an academic depth, the focus has been to solve the problem at hand, using some of the limited professional literature there is. From what I'd say on a formal aspect, with the requirements I'd have one of my own students, there'd be room for some improvement. However, I am very aware of that how you write a master's thesis is very different from a cultural aspect, and therefore I choose a mid-level grade.

I **recommend** the master's thesis for the defence.

**Summary classification of the master's thesis ..... A (excellent) ... 1,0**
