David,

Thank you for your email and good luck with the work.

SkyWall100 is already in use with law enforcement and specialist military authorities, references can be provided. It has been deployed to protect against drone threats at high profile public events. Most authorities deploy the system as a last line of defence, alongside electronic counter measures (ECM), or where regulations mean that ECM cannot be used.

As example prices, the SkyWall100 launcher is between £35-65k GBP, depending on quantity. The SP40 projectiles (net and parachute) are sold separately and cost between £1,400 to £1,800. They are reusable and get reset with a fresh net and parachute for under £400 GBP.

SkyWall300 is not yet available but will be ready in early 2019. It will offer a low cost, automatic system.

I hope that helps

Regards
James Cross

Subject: Anti-UAV system

Dear Sir or Madam,

My name is David Kryška, I am a student of Czech Technical university in Prague.

Right now, I am writing a Bachelor's thesis on the topic "Threats caused

24. 8. 2018

Gmail - Anti-UAV system

by unmanned aerial vehicles and defenses against them". I have read about your Anti-UAV system on your website and I would like to ask you if you could send me any price list of your Anti-UAV product (SkyWall). In my thesis, I would like to compare multiple Anti-UAV solutions in terms of acquisition costs.

I hope it is not a problem or is internal information?

Thank you for your time - I look forward to hearing from you.

Yours sincerely,
Kryška David
