Dear David

Thank you for your email. You are right to suggest that pricing is sensitive and we normally only release such information on exchange of a Non-disclosure Agreement. But that wouldn't help you in your thesis.

To offer a ball-park figure, AUDES 360 Fieldmast system such as <https://www.flickr.com/photos/blighter-surveillance-systems/30277697045/> will cost in the order of GBP 1.2 M. This includes all hardware, connectivity Command and Control suite and software.

If I may; one way in which you might conduct your analysis is based on the effective range of the equipment and the area under surveillance. AUDES will reliably detect a DJI Phantom at 3.5km. Therefore the area under surveillance is 38.5 km². Therefore the cost per km² is GBP 31,181. Which is really quite reasonable 😊

I hope that this helps

Kind regards

Bob

Subject: Anti-UAV system

Dear Sir or Madam,

My name is David Kryška, I am a student of Czech Technical university in Prague.

Right now, I am writing a Bachelor's thesis on the topic "Threats caused by unmanned aerial vehicles and defenses against them". I have read about your Anti-UAV system on your website and I would like to ask you if you could send me any price list of your Anti-UAV product (AUDES).

In my thesis, I would like to compare multiple Anti-UAV solutions in terms of acquisition costs.

I hope it is not a problem or is internal information?

Thank you for your time - I look forward to hearing from you.

Yours sincerely,

Kryška David
