Popis pracovní příležitosti

As a Senior Building Information Modelling (BIM) Developer at HS2 you will ensure that high quality technology solutions are designed and developed to meet user needs as part of the design of HS2 information services, that they are in line with HS2's BIM Strategy and that they are integrated as part of an HS2 digital ecosystem supporting development, construction and operation of the railway.

This role sits within the BIM department within our Infrastructure Directorate (ID) that is ultimately responsible for enabling a whole life approach to managing HS2's digital assets and realising their value. ID acts as the future Infrastructure Manager and Network Operator for the HS2 infrastructure. ID also acts as Proxy Operator until West Coast Partner starts as Shadow Operator, subsequently integrating WCP requirements into the programme. ID has combined the technical and operational expertise providing a single guiding mind for the requirements for the operating railway and is the technical authority for HS2.

About the role:

- Provide technical assurance of and if necessary assist the BIM Information Systems Manager, BIM Development Manager, GIS Lead and Solutions Architects in the design of technology solutions in IT delivery tracks to ensure new or changed services meet user needs;
- Lead the internal software development and scripting, work with delivery teams, partners and suppliers to ensure that solutions being developed are robust;
- Manage external development services and lead, support and mentor other software development staff;
- Ensure HS2 information technology solutions are integrated to form a digital ecosystem delivering a great user experience;
- Analyse and understand specific project and organisation requirements and provide time and effort estimates for implementation of business requirements;
- Work as part of a team or independently (depending on the size of the project) to undertake development, testing and implementation of applications to meet specific project requirements;
- Lead the resolution of technology issues arising in delivery and operation of applications, responding to downtimes;
- Understand and manage system quality with regards to simplicity, usability, availability, security and fraud avoidance;
- Perform maintenance of existing Common Data Environment systems, writing manual and automated tests and regularly perform these;

Popis pracovní příležitosti

Job Description

Since 1964, the MCW Group has built a solid reputation for the delivery of Professional Consulting Engineering Services, Energy Management Services, and Engineering Development Services.

The systems designed by the MCW Group of Companies are built to deliver energy effectively in the form of lighting, heating and cooling, as well as information in the form of voice and data. By the very nature of the solutions provided, the MCW Group of Companies helps to create the environments required for Clients to live, educate, work, play and heal.

For further Information please check out our website: www.mcw.com.

Our Company is currently seeking a self-motivated, hardworking Building Information Modelling (BIM) Development Co-op Student to join our Toronto office. Located just minutes from Union Station, this is an excellent opportunity for someone who is looking to grow and develop their professional career in the consulting industry. The ideal candidate takes initiative, is interested in pursuing a career in engineering consulting and is willing to take on responsibility as his/her experience progresses.

Position: BIM Development Student

Duration: 4-Month work term with the possibility of extension.

Start Date: Jan 7, 2019

Wage: Hourly based on skills and experience

Location: Toronto

Responsibilities: The Responsibilities of this position include but are not limited to the following:

Obrázek 3 CAD/BIM Detailer; Zdroj: linkedin.com

The screenshot shows a LinkedIn job listing for a CAD/BIM Detailer at Miller-Eads Company in Indianapolis, IN, US. The job was posted 2 weeks ago and has 7 views. There are two buttons: 'Uložit' (Save) and 'Snadná žádost' (Easy Apply). The job description and requirements are visible below the post.

Popis pracovní příležitosti

A CAD/BIM Detailer position is available at Miller Eads Co. We are an award-winning electrical contractor that has a growing CAD/BIM department. To be considered, applicants must have minimum 2-year degree in CAD/BIM from an accredited college is preferred. Electrical/Construction knowledge is not required but preferred. Must have Revit and AutoCAD experience and be a self-starter in both. Training in Bluebeam and Trimble will be provided if not familiar already.

- Create professional industry CAD Drawings from sketches, concepts or engineer requests.
- Create CAD drawings/models in 2D and 3D for shop prefabrication
- Convert .dwg file types (or other design file formats associated) to PDF for initial bids.
- Draft electrical system site maps, single lines, schematics, riser diagrams under senior designer/engineer's supervision.
- Organize and assemble electrical drawings, submittal PDF Sets.
- Update "As-Built" CAD Drawings per field/Project Manager red lines.
- Create accurate Bill of Materials where required.
- Learn and maintain AutoCAD block libraries, LISP Routines, and Revit families to help automate drafting processes.
- Working on multiple projects, sometimes in one day.
- Must be organized and be able to set priorities as needed by field install dates.
- Place Trimble points to show geospatial location for field use and coordination.
- Coordinate with Trimble field operator for changes/updates to CAD job file.
- Navigate and operate in Revit/Detail sheets as needed for prefab in shop.
- Keep up to date on latest technology developments and utilize them for increased productivity and efficiency.

Miller-Eads Company has been a leader and innovator for almost 50 years. From the beginning we have never settled, but instead continue to push and innovate every day. We are excited to play a part in helping our customers achieve success, leveraging the best technologies and techniques available.

Requirements

- 5+ year's work experience in design and drafting in the electrical field.
- Must have an in-depth working and practical knowledge of current Revit, Navisworks and AutoCAD MEP.
- Strong written and verbal communication skills.
- Must have a professional appearance.
- Ability to use time productively, maximize efficiency, and meet challenging work goals.
- Ability to take on additional responsibilities as needed as well as determine and manage priorities with minimal guidance.
- Must possess and maintain exceptional work ethic as well as uphold company values and demand the highest standard of conduct from self and others.
- Must have basic PC experience in Windows environments (Word, Excel, Power Point, etc.) along with web-enabled applications and database software.
- Must be a self-starter and possess the drive to pursue continued education on BIM.
- Work well as part of a team and independently.

Required Qualifications

- Associates Degree in related field or experience required
- 1 to 3+ years experience in support of mechanical systems production with associates degree.
- 6+ years experience in support of mechanical production required with no degree.
- Exceptional Revit skills are required
- An attitude and commitment to being an active participant of our employee-owned culture is a must

Preferred Qualifications

- Previous experience with an architectural/engineering or engineering consulting firm
- Strong preference given to local candidates

Why HDR

At HDR, we know work isn't only about who you work for; it's also about what you do and how you do it. Led by the strength of our values and a culture shaped by employee ownership, we network with each other, build on each other's contributions, and collaborate together to make great things possible. When you join HDR, we give you license to do the same. We help you take charge of your career, giving you multiple growth opportunities along the way.

At HDR, we are committed to the principles of employment equity in all of our offices. USA: We are an Affirmative Action and Equal Opportunity Employer. We consider all qualified candidates regardless of minority, veteran, disability, sexual orientation, gender, gender identity or any other status protected by law. CANADA: We welcome applications from all qualified individuals. AUSTRALIA: We consider all qualified candidates regardless of gender, ethnicity, country of birth, political or religious affiliation, health status, or any other status protected by law.

Health and safety is also our priority. For some positions, you may be required to provide drug and alcohol testing, before or during employment, based on our Drug Testing and Drug Free Workplace Policy. If you are required to drive for us, we require a valid driver's license and compliance with our vehicle policy.

The screenshot shows a LinkedIn job listing for 'Mechanical BIM Designer' at HDR in Charlotte, NC, US. The HDR logo is on the left. The job title and location are at the top. Below that, it says 'Zveřejněno před 2 týdny · 306 zobrazení'. There is a small icon of a person and the text '1 absolvent školy zde pracuje'. At the bottom of the job card are two buttons: 'Uložit' (Save) and 'Podat žádost' (Apply).

Popis pracovní příležitosti

About Us

At HDR, we specialize in engineering, architecture, environmental and construction services. While we are most well-known for adding beauty and structure to communities through high-performance buildings and smart infrastructure, we provide much more than that. We create an unshakable foundation for progress because our multidisciplinary teams also include scientists, economists, builders, analysts and artists. That's why we believe diversity is our greatest strength. HDR is proud to be an equal opportunity workplace and an affirmative action employer.

Watch our 'About Us' video

We believe that the way we work can add meaning and value to the world. That ideas inspire positive change. That coloring outside the lines can illuminate fresh perspectives. And that small details yield important realizations. Above all, we believe that collaboration is the best way forward.

Primary Responsibilities

HDR is currently seeking to hire a Mechanical BIM Specialist for our East Region Design Center in Charlotte, NC. This person will be responsible for the BIM production of facilities related mechanical systems (HVAC and plumbing) across a variety of markets including Water/Wastewater, Municipal, Industrial, and Federal. This person will coordinate and work closely with a lead mechanical engineer and a multidiscipline design team throughout the entire life cycle of projects from planning stages, through the development of construction documents. This individual will be responsible for the development of mechanical systems models, detailing, and plan creation in BIM. This individual should be self motivated, with initiative to deliver high quality mechanical construction documents.

Popis pracovní příležitosti

Leading Mechanical contractor is looking for BIM Designers/Detailers to join their team. Sheet metal or Piping design experience.

Design systems using CAD and Revit and provide technical support to various departments regarding design work.

Significant Duties:

- Review plans and set up CAD files provided by the architect.
- Design systems based on architectural drawings and material specifications.
- Generate isometric and lay in drawings for fabrication and field use.
- Develop MR and perform take-off on all drawings.
- Provide technical support for fabrication and field operations.
- Collaborate with field operations supervisors to make design changes. Record changes and process adjustments based on such.
- Other duties or projects as required or assigned.
- Responsible for the maintenance of all files related to the specific job tasks.

Requirements:

- Good oral and written communication skills are needed, as are self start abilities, and must be able to establish and maintain good working relationships with many different people inside and outside of the company.
- Familiarity with computers, AutoCAD, Revit, Excel, and plan reading would be a huge plus.
- Ability to deal with multiple tasks, high pressure situations, and a fast pace.
- Sheet metal or Piping experience

Popis pracovní příležitosti

VDC/BIM Plumbing Coordinator

The BIM Coordinator will assist the BIM Manager in developing detailed construction documents and field layout information. This role will require drafting/coordination on a large variety of renovation, new construction, plan and spec, and design build projects. Typically, these projects will include 3D modeling and coordination of potable water, storm, sanitary, vent, hangers, etc. A candidate for this position should be a critical thinker, able to adapt to fast paced and very fluid construction schedules, and able to multi-task efficiently.

Job responsibilities may include but are not limited to:

- Read and interpret project engineering plans, specifications and submittals.
- Maintain project files, parts database, model content, etc.
- Data and Document entry into various platforms such as AutoCAD Fabrication and Revit.
- Build 3D models of AS-Built conditions.
- 3D coordination and design of new and/or renovation plumbing systems.
- Build federated models from the various trades construction documents.
- Final construction document creation.
- Prefab spool drawing creation.
- Layout point creation for use in a Total Station.
- Support field staff as needed during the duration of construction.

Qualifications for this position:

- 2-year certificate in AutoCAD or comparable AutoCAD experience desired.
- 2-5 years Plumbing or Mechanical coordination experience desired.
- Proficiency with AutoCAD and/or Revit preferred, including AutoCAD Fabrication and Revit project setup experience.
- Strong communication and organizational skills.
- Strong ability to prioritize multiple task and attention to detail.
- Knowledge of plumbing and piping design.
- Working knowledge of construction terms and processes.
- Proficient computer skills required.
- Team-player with the ability to work independently.

We are an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status or any other characteristic protected by law.

Popis pracovní příležitosti

Looking to step up into a BIM Coordinator role and accelerate your BIM career?

Your new company

This well known and award winning multi-disciplinary has become the go-to for BIM staff nationally due to their investment in BIM technology and training. They are one of the most advanced in software and processes, and along with a strong training and development programme, they have a sociable and talented team of pro's.

Your new role

You will be taken the BIM lead on large pharma/health/commercial projects across the country, taking the highly complex design drawings from all the disciplines, amalgamating them, performing clash detection, edits, and re-issuing to ensure the model is kept to the top level of detail and quality. You'll be using Revit and Navisworks on a daily basis, and you'll be encouraged to push boundaries and take things to the next level, further enhancing your skills and abilities. Alongside this you will be responsible for BEP, EIR, 4D, 5D & 6D protocols and you'll need to adhere to PAS 1192-2, BS 1192 & all the other BIM standards.

What you'll need to succeed

You absolutely must be a successful BIM Coordinator either with a main contractor or Architectural practice in the UK. Revit and Navisworks software use is essential, and you'll need to demonstrate your ability to work with all disciplines in the industry.

What you'll get in return

If your calling is all things BIM, then this position is for you. Your skills will be pushed to the limit, your career catapulted forward, and there will never be a dull moment in the office. Plus you'll be well paid for your efforts.

What you need to do now

If you're interested in this role, click 'apply now' to forward an up-to-date copy of your CV, or call us now.

If this job isn't quite right for you but you are looking for a new position, please contact us for a confidential discussion on your career.

Hays Specialist Recruitment Limited acts as an employment agency for permanent recruitment and employment business for the supply of temporary workers. By applying for this job you accept the T&C's, Privacy Policy and Disclaimers which can be found at hays.co.uk

Responsibilities

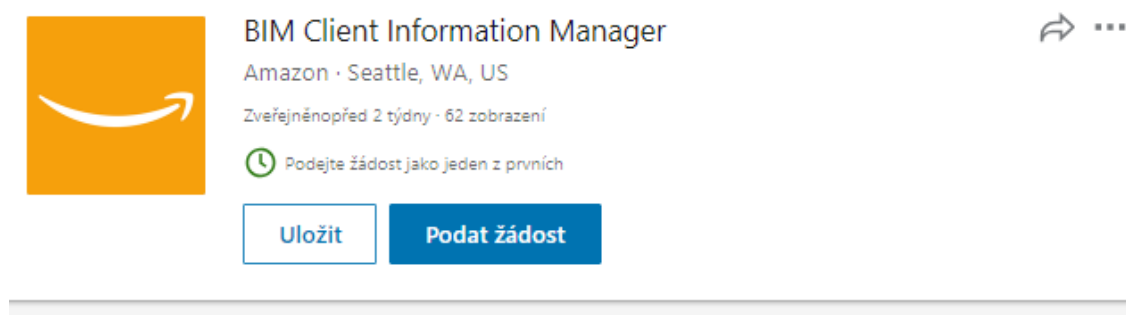

Daily responsibilities will include working on all aspects of the entire Data Center life cycle starting with design, construction, and maintenance of Data Center Revit models for the Americas Region. Our goal is to establish and maintain level 3 full life cycle BIM processes for AWS data centers for use by a wide variety of internal customers. Your duties will include:

- Help establish and maintain Revit standards, processes, and workflows
- Educate and train internal teams in BIM software, procedure, and best practices
- Assist in creating and maintaining standard regional and global templates and family libraries
- Work to establish and maintain a common data environment, along with processes, procedures, and security around the Amazon design team's information exchanges
- Establish information structure and standards for the information model, coordinate output formats, and validate data quality
- Establishing responsibilities for the provision and compliance of information and its level of detail for each project stage
- Assist the project team to establish information exchange processes between internal customers
- Work with construction team to coordinate and maintain Revit models throughout the build process
- Coordinate with design, procurement, construction, controls, and operations to create and maintain AS-Built and asset management models
- Creation, recording, and reporting of key metrics to team members and management
- Travel to Data Center sites for Engineering evaluations and surveys as required

Basic Qualifications

- 5+ years of cumulative experience in Industrial or Commercial MEP model and drawing production of critical facilities
- 5+ Years' experience using Revit for producing engineering models and drawings
- Ability to carry drawing standards through exploration, development, and into deployment/mass production
- Familiarity with AIA and NBIMS standards and best practices for BIM collaboration
- 3+ Years' experience applying continuous Improvement methodologies, practices and concepts to modeling and design work (ex: LEAN, Six Sigma, Kaizen)

The screenshot shows a LinkedIn job listing for 'BIM Client Information Manager' at Amazon in Seattle, WA, US. The job was posted 2 weeks ago and has 62 views. There are two buttons: 'Uložit' (Save) and 'Podat žádost' (Apply). A share icon and a menu icon are visible in the top right corner.

Popis pracovní příležitosti

Amazon's Data Centers are industry leading examples of innovation in the areas of space utilization, energy efficiency, and cost effectiveness. We are known for our speed to market and reliability. We are the global team responsible for the design and operation of critical industry leading Data Center facilities located throughout the world. Our Design Team is on the forefront of creating and delivering the most innovative products to our customers; and are known for being a diverse and upbeat team that is changing the face of Cloud Computing. We continue to grow and are looking for individuals that can support our speed to market, enjoy a challenge, and have a desire for professional growth and continuous learning. Amazon's work environment is unique in every aspect and offers an exceptional opportunity for the right candidate. At Amazon we do highly support continued learning opportunities and focus on continued employee development.

As the BIM Client Information Manager you will be a part of highly creative and efficient team tasked with tackling the most fascinating and challenging problems in designing, building, and operating Amazon owned Data Center facilities globally. You will be responsible for working with the organization's leadership to implement full building life cycle BIM strategy for our design, construction, and operations processes by helping to develop and implement our Innovation and Strategic road-map.

Amazon has a global presence therefore domestic and international travel may be necessary. Team work is absolutely necessary for us to accomplish our goals. You must be able to work within a team and depend on others to accomplish the required work. This includes working with internal groups as well as external suppliers and consultants including utilities, manufacturers, vendors, and contractors.

If you are a creative, smart and driven individual that enjoys working with complex problems and in teams we want YOU!

Job Description

VDC / BIM ASSOCIATE, Virtual Construction

HITT Contracting Inc. seeks a full-time VDC associate to join our Virtual Construction team in the Falls Church, Virginia headquarters office. This entry to mid-level VDC associate will lead the implementation of BIM and Virtual Construction technology on a project level. Additionally, the associate will act as the point of contact with subcontractors involved in supporting VDC implementation on the project. The Virtual Construction department is engaged in leading the adoption of new technology, research, training, and R&D of new tools, such as 3D Printing, and Mixed Reality.

The ideal candidate is detail-oriented, organized, high-performing, and has strong communication skills. Key to this position is the ability to multi-task and to remain cool while working under multiple deadlines. The position requires attention to detail and the overall objectives. Candidates must submit a resume, relevant work sample in PDF format (10Mb Max.) or web based link and cover letter by email to dstone@hitt-gc.com.

Popis pracovní příležitosti

Job Description:

BIM Architect

TP Bennett are currently recruiting for an experienced Senior Architectural Technician to work on a high-level commercial project in London.

A commercial/office experienced technician with proven track record of providing BIM/REVIT team co-ordination. You will be responsible for 2 days a week in managing in-house the TPB BIM/Revit information and submitting to external Project BIM co-ordinator and liaison with all other consultants.

The other 3 days will be producing Stage 3 design development architectural packages with the intention to progress all the way through to site/completion.

In Brief:

- Ideally contract for 3 month, possibility of internal move to BIM Team.
- Experience in designing and building large UK office blocks (commercial experience)
- Experience in UK building regulations
- Ability to write NBS specifications a bonus, but not necessary

PROJECT DESCRIPTION

They will be working on a 250,000sqft new build, consisting largely of 12 story's of commercial space with retail at ground and podium levels. The building is located in a prominent part of midtown and has a very high design profile. We are currently working through RIBA stage 3.

If you feel you match the above criteria, please send a full CV + Portfolio to careers@tpbennett.com

CAD/BIM Technician

Murphy Process Engineering Limited · County Dublin, Ireland

Zveřejněno před 2 týdny · 171 zobrazení

[Uložit](#) [Snadná žádost](#)

Popis pracovní příležitosti

Murphy Process Engineering Limited are a leading turnkey contractor serving public and private sector clients in the water and wastewater treatment sector. We have an immediate requirement for CAD/BIM Technicians to join our design team to work on a number of major infrastructural and industrial projects. The position will be based in our offices in Citywest, Dublin with occasional requirements to visit client sites around Ireland.

Key Responsibilities and Duties

- To produce 2D and 3D general arrangement, schematic and P&ID drawings for water and wastewater treatment plants and pumping facilities using AutoCAD software.
- Surveying of existing sites in order to generate 2D and 3D drawings.
- Ensure that drawings and designs meet internal, client and industry standards
- Liaise with the project team and technology providers in the development of design drawings.
- Assist and/or lead in the control of documentation for the department in accordance with company procedures.

Essential Attributes

- Minimum of 3 years' experience working as a CAD Technician, preferably in a relevant mechanical design field.
- Proficiency in the generation of 2D and 3D drawings using AutoCAD.
- Strong IT skills.
- Excellent attention to detail and ability to solve problems and co-ordination issues.
- Strong interpersonal skills and an ability to work effectively as part of a team.
- Ability to prioritise and plan workload efficiently and work without the need for excessive supervision.
- Non-EU citizens must hold a valid work permit entitling them to take up full time employment within the EU.

Desirable Attributes

- Direct experience in the mechanical design of water and wastewater pumping and treatment systems a strong advantage.
- Third level qualification in a relevant discipline.
- Experience of BIM systems.

Popis pracovní příležitosti

About Us

At HDR, we specialize in engineering, architecture, environmental and construction services. While we are most well-known for adding beauty and structure to communities through high-performance buildings and smart infrastructure, we provide much more than that. We create an unshakable foundation for progress because our multidisciplinary teams also include scientists, economists, builders, analysts and artists. That's why we believe diversity is our greatest strength. HDR is proud to be an equal opportunity workplace and an affirmative action employer.

Watch our 'About Us' video

We believe that the way we work can add meaning and value to the world. That ideas inspire positive change. That coloring outside the lines can illuminate fresh perspectives. And that small details yield important realizations. Above all, we believe that collaboration is the best way forward.

Primary Responsibilities

In the role of Electrical BIM Specialist 1, we'll count on you to:

- Create electrical drawings for facilities, such as lighting systems, power systems, communications, security and fire detection in compliance with the National Electrical Code (NEC)
- Develop entry-level drawings by using computer-aided design software under the direct supervision of other Electrical Technicians or Engineers
- Demonstrate knowledge of procedures for production of design developments and construction documents, and a thorough knowledge of engineering planning, drafting and detailing
- Perform other duties as needed

Bim Specialist

DeSimone Consulting Engineers · San Francisco, California, United States

Zveřejněno před 1 dnem · 71 zobrazení

 1 absolvent školy zde pracuje

[Uložit](#) [Snadná žádost](#)

Popis pracovní příležitosti

DeSimone Consulting Engineers is seeking a BIM Specialist in our San Francisco office.

The main job functions include providing BIM/CAD modeling/drafting to support development, planning, engineering or other technical services of the company. Candidate will operate BIM input station to generate structural models, working drawings and sketches; prepare models, layouts and drawings of concrete, steel and timber structures consisting of plans, elevations, sections and details from rough or detailed sketches and/or drawings; produce various design options on the screen and on hard copy, following an engineer's verbal instructions; assist in resolving a design concept not yet completely defined; and input required commands to complete the tasks outlined above.

Requirements

- High School diploma or equivalent and minimum two years specialized technical drafting training
- Minimum five years BIM operating experience
- Must be able to operate an auto-graphics (CAD) input station and possess the necessary skills to develop structural working drawings and sketches
- Must be detail-oriented with good communication skills

DeSimone offers a competitive salary and a comprehensive benefits package, which includes medical, dental, vision, short- and long-term disability and life insurances, 401(k), gym and tuition reimbursement, paid time off and more. Please visit our website at www.de-simone.com for more information.

DeSimone is an Equal Opportunity Employer.

Requirements

- Bachelor's Degree in Construction Management or Civil, Architectural, or Mechanical Engineering and/or evidence of exceptional experience.
- Hands-on experience working with Trades on construction of high-tech infrastructure and operational facilities (semiconductor, solar, battery, etc.).
- Proficiency in AutoCAD, Revit, Navisworks and general awareness of other BIM software applications.
- Experience interfacing with construction and cost control on quantity takeoffs and alignment between Work Breakdown Structure based cost tracking and BIM parameters

Qualifications

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required.

Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

EDUCATION And EXPERIENCE

Bachelor's degree (BA/BS) from 4-year college or university. Minimum four years of related experience. Prior Supervisory experience preferred.

- 3 years document control / document management experience
- BIM 360 Experience a PLUS
- Strong technical knowledge of Autodesk BIM 360 suite of tools
- Familiarity with different document control tools and EDMS systems, (i.e. such as Autodesk BIM 360 Docs)
- Knowledge of SDLC (Software Life Cycle) methodology
- Familiarity with GSuite products (gSheets, gDocs, gSlides, etc.)
- Experience working in data centers or other large industrial scale facilities (oil refinery, nuclear plant, etc.)
- Have a valid passport and the ability to travel

CERTIFICATES and/or LICENSES

PgMP (Program Management Professional) or PMP (Project Management Professional) certifications preferred.

Communication Skills

Excellent written and verbal communication skills. Strong organizational and analytical skills. Ability to provide efficient, timely, reliable and courteous service to customers. Ability to effectively present information.

FINANCIAL KNOWLEDGE

Requires advanced knowledge of financial terms and principles. Ability to calculate intermediate figures such as percentages, discounts, and commissions. Conducts advanced financial analysis.

REASONING ABILITY

Ability to comprehend, analyze, and interpret complex documents. Ability to solve problems involving several options in situations. Requires advanced analytical and quantitative skills.

OTHER SKILLS And ABILITIES

- Strong process skills, negotiating, decision-making and analytical skills are necessary. Demonstrated ability in project management processes, tools and techniques.
- Ability to build and maintain effective professional/client relationships.
- Intermediate skills with Microsoft Office Suite including MS Project.

- *Working with Document Management leads and IT team to determine what system configurations are needed. Test configurations in stage environment and deploy in production.*
- *Facilitating meetings such as bug and feature request prioritization meetings*
- *Accurately classify incoming system issues and bugs, seeking clarity from those who report them if necessary. Set initial priority ratings and route for proper and timely resolution.*
- *Maintaining and managing list of system bug and enhancement requests and follow up with those who are assigned action items. Ensure response SLAs based on priority level are met.*
- *Creating and running reports on bug closure rates and throughput velocity of feature request development*
- *Providing regular reports to client Document Management Tools & Systems Project Management on the needs of the business and assist in prioritizing resource asks as well as system feature enhancement requests.*
- *Drafting communications for review including emails, newsletters and web site updates.*
- *Creating and maintaining program information and documentation including internal web site pages, project management timelines and schedules and gantt charts.*
- *Creating, developing and maintaining training documentation including training videos.*
- *Drafting scripts and storyboards, as well as producing, editing and publishing training videos*
- *Training others on the features and use of client's EDMS tools*
- *Assisting with document migration from system to system including documentation analysis and migration preparation*
- *Auditing document metadata for completeness and formatting standards, and perform metadata updates when needed before upload.*
- *Accurately assigning metadata to large numbers of files*
- *Managing and maintaining system access and control permissions*
- *Managing administration of Partner Domain accounts*
- *Helping deploy new tools, systems and feature enhancements*
- *Ad-hoc administrative tasks as needed, including scheduling meetings and travel, sending calendar updates, assisting with expense reports, etc.*
- *Additional tasks and assignments as required*

Popis pracovní příležitosti

Joseph J. Albanese, Inc. is seeking a full-time **BIM Modeler** to join our Virtual Construction team. As a member of the Virtual Construction department, this individual will report directly to our Virtual Construction Manager.

Essential Duties & Responsibilities

- Analyze construction drawings and build 3D model of concrete scope of project
- Identify design issues through RFI process
- Prepare shop drawings for submittal and coordinate with field crews
- Prepare digital files for TotalStation layout in field
- Coordinate with other trades through consolidated Navisworks models

Qualifications

- 2+ years Revit experience, Revit Professional Certification a plus
- Bachelor's degree in architecture, engineering, or construction preferred
- Strong computer skills in Revit and Microsoft Office, familiarity with PlanGrid, Bluebeam, and Navisworks
- Ability to read and understand construction drawings
- Excellent written and oral communication skills
- Strong work ethic, team player, and attention to detail

Why Work for JJA

- Leader in the Northern California construction community since 1955
- JJA utilizes BIM and other cutting-edge technology to verify constructability and to communicate complex project geometries to field professionals
- High-profile projects include: Facebook, Apple, Samsung, Levi's Stadium, Stanford, San Jose State University
- Competitive pay and benefits

Joseph J. Albanese, Inc. is an Equal Opportunity Employer.

Obrázek 26 CAD/BIM Modeler; zdroj: linkedin.com

The screenshot shows a LinkedIn job listing for a CAD/BIM Modeler at LERA Consulting Structural Engineers. The company logo is on the left, and the job title is on the right. Below the title, it says 'LERA Consulting Structural Engineers · New York, NY' and 'Zveřejněno před 1 týdnem · 183 zobrazení'. There is also a small icon indicating '1 absolvent školy zde pracuje'. At the bottom of the job card, there are two buttons: 'Uložit' (Save) and 'Snadná žádost' (Easy Apply).

Popis pracovní příležitosti

Responsibilities:

The CAD/ BIM Modeler will be involved in developing detailed models and construction documents related to the structural engineering discipline. Responsibilities include

- Developing detailed design drawings using Revit and AutoCAD software.
- Working with fellow CAD/ BIM Modelers in a supportive role on projects.
- Modifying drawings and 3D modeled elements based on Interpreted engineer's markups.
- Collaborating with structural engineers to layout and detail components and structural systems.

Requirements:

- Excellent knowledge of Revit and AutoCAD software.
- Strong attention to detail with emphasis on organization.
- Knowledge of Microsoft office applications.
- Ability to work independently and meet deadlines.
- Ability to exercise independent judgment using technical knowledge.
- Good interpersonal skills and ability to coordinate with others.
- Strong organizational skills and effective written/verbal communication skills.
- Degree in an AEC-related discipline and knowledge of Rhino and/or Grasshopper preferred.

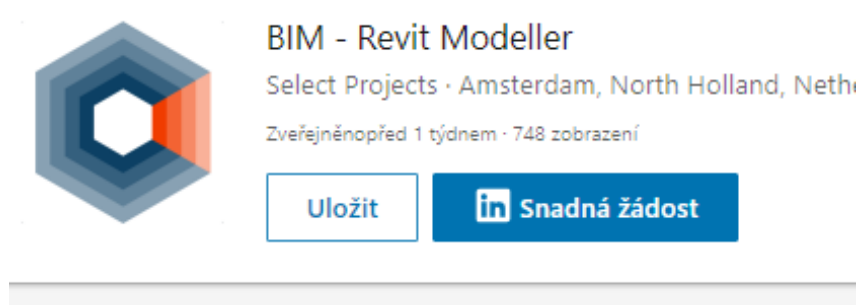

Benefits:

LERA offers a competitive salary, and a comprehensive benefits package which includes medical, dental, vision, and life insurances, a 401K profit sharing plan, paid vacation and sick leave, and flexible working hours. LERA is an Equal Opportunity Employer.

Popis pracovní příležitosti

Job Description

At EXP, we know that great experiences start with the right people. We believe that work should be challenging, and the challenge should be fun. We also believe that exponential possibilities are more likely to occur with a respectful, satisfying and empowering company. We value and respect our employees - their experience and expertise as well as their energy, passion and diversity - and their innovative approach to work and to life.

Your Challenge

We are seeking an experienced and motivated BIM Model Manager to work in a flexible role located in our Orlando, FL office that includes multi-discipline building information modeling (BIM) management, for Hospitality, Entertainment and Healthcare Facilities Projects. Work will be performed under the supervision of senior staff.

Your Responsibilities

- Set up models received from the Client, including plot sets, working views, various plan sections, to support the needs of EXP's design team.
- Engage the Client's model manager counterparts directly to work thru model challenges.
- Provide on-going REVIT and BIM training and troubleshooting for engineers and designers throughout the design, in support of project deliverables.
- Attend internal project team meetings to understand deliverable schedules.
- Manage model exchanges including updating models received from the Client in a timely manner as well as transmit model to the Client.
- Regularly perform model "health checks" and work with the design team and EXP's BIM team leader to make adjustments.
- Provide clash detection support, including running Navisworks or other analysis applications, and work with the design team to understand and resolve conflicts.
- For deliverables, update title blocks, batch plot all sheets, and perform quality control review of all sheets prior to delivery to the Client.
- Prepare Navisworks and AutoCAD exports from Revit.
- Upload/download PDFs, Revit, Navisworks, and AutoCAD files to/from the Client's internet hosting site.
- Assist in the development of BIM content.
- Develop project BIM execution plans. Collaborate with design teams

Popis pracovní příležitosti

BIM Manager for Prominent Architecture Practice

£45,000 - £50,000 per annum + Benefits (Permanent)

South-West England

We are working with one of our key clients, a prominent architectural design studio with multiple offices and a reputation for their innovative designs, who are seeking an experienced **BIM Manager** to join their team in their **south-west of England** office on a **full-time permanent** basis. The successful BIM Manager will come from an architectural/construction background and will play an integral role in sculpting the future of BIM within the firm.

Key Responsibilities:

- BIM implementation and management
- Working on project interfaces
- Managing BIM standards within the practice
- Responsible for learning and development of staff – coordinating training, keeping staff up to date with industry trends and developments, providing support where needed

This is a great opportunity for an experienced and passionate individual to join a progressive practice, taking on a senior role with a **perfect mix of management and hands-on**. You will also receive a competitive salary and a generous benefits package - even including a free daily lunch!

Don't miss out on this BIM Manager role and apply by sending your up to date CV to **Katie Jones** at Adrem Group, or get in touch for more details – my direct email address and contact number can be found on the Adrem website.

Job Title: BIM Manager

Department: BIM

Location: SE1 0NE

Salary: Competitive

Overview:

We are currently looking for an exceptional BIM Manager to join us here at tp bennett. You will play a critical role in Revit-authored BIM models to be more frequently and comprehensively audited, for the BIM content library structure to be elaborated upon and subsequently better managed, and for an element of user support to be provided.

You will actively contribute towards an industry leading BIM capability structure with specific focus on model auditing and content management, with a key aspiration to join the company BIM Director in presenting the structure at various industry events in mid / late 2019.

Key skills:

- Exceptional Revit capability with particular focus on model auditing and content creation
- Good understanding of UK building construction fundamentals
- An awareness of BIM process fundamentals (BS / PAS 1192 aligned)
- Strong communication skills with good written and spoken English
- Organised, hard-working, and self-disciplined with ability to take initiative
- Autodesk Revit: Advanced
- Autodesk Navisworks Manage: Intermediate
- Solibri Model Checker: Intermediate
- Revizto: Basic
- Unifi: Basic
- Commercial office / interior fit-out / retail / student residential
- RIBA Stages 3-4 as a minimum
- Minimum 5 years post-qualification

Desirable skills:

- Experience of working in a centralised support function
- Experience of speaking and presenting at industry events
- Use of Dynamo (visual programming tool)
- Supportive – want to support colleagues with the development of their knowledge and capability
- Confident – ability to enforce protocol in project team workshop environment
- Ambitious – drive to actively contribute towards developing an industry leading structure

Popis pracovní příležitosti

Our client is one of the largest further education colleges in Kent, offering excellent career prospects and benefits.

They have an opportunity for an experienced, qualified and inspirational lecturer / teacher to join their Construction and the Built Environment team, with a focus on teaching CAD (Computer Aided Design), BIM (Building Information Modelling) and Measurement, to help students understand these tools and how they will help them more efficiently plan, design, construct, and manage buildings and infrastructure.

As lecturer, you will work as a member of a growing team who deliver a co-ordinated, integrated study programme ensuring that students receive a high quality learning experience and achieve success.

Candidate Requirements

Higher level qualification in relevant construction / built environment subject
Strong experience of CAD, BIM and Measurement techniques
A wide range of industrial experience to pass on to students
Happy to deliver to QCF / NQF programmes at Level 3, to full time students and apprentices
Teaching Qualification, or willing to work towards one (e.g. DTLS, PGCE, Certificate of Education)

Internal Verification Experience (not Essential)

The College offers many excellent benefits including access to competitive pension scheme, generous annual leave entitlement and on-going professional development.
Our client is an equal opportunities employer. They value diversity in their people and all applications will be welcomed and considered regardless of a person's age, sex, religion, marital status, sexual orientation or ethnic origin

Qualifications

- Bachelor's or Master's Degree in Architecture, Design, and/or Computational Design
- 3-5 years of experience in Architecture, BIM, or design related field
- Ability to drive a project's BIM deliverable from inception to completion
- Expertise with Revit, Rhino, & Graphical Programming is essential
- Coding experience a plus but not required
- Solid understanding of project delivery and construction methods relevant to the country of work
- Impeccable and concise communication and presentation skills, verbal and written
- Highly resourceful problem solver and quick learner with demonstrated ability to consistently meet deadlines while managing multiple projects simultaneously
- Excels under pressure and can maintain a calm demeanor at all times
- Ability to work both independently and cooperatively in a fast-paced environment

Who You Are

- Creative, hungry, and ready to roll your sleeves up to get the work done
- Passionate about collaborating and putting out the absolute best work
- Great at managing productivity and your own projects

Popis pracovní příležitosti

Position Summary

CRB is looking for an energetic, self-motivated individual for the role of BIM/CAD Lead. Candidate must possess the skills required to successfully execute project tasks, have a strong work ethic and be a dynamic team player. This person should also have a passion for BIM innovations and emerging technologies in the AEC industry. The candidate would perform lead BIM/CAD functions for the team for all projects as well as coordinate with clients and sub-consultants on BIM/CAD standards. Individual will work closely with CRB project discipline leads, expert teams and the regional BIM coordinator on internal BIM/CAD standardization. Experience in Revit and AutoCAD with 3D modeling capabilities is a must, as well as the ability to work in other compatible design software packages. Projects will consist of both existing building renovations and new construction. Project sizes will vary and require documentation for various disciplines including but not limited to Architecture, Electrical, Fire Protection, HVAC, Piping (Mechanical, Process, Plumbing) and Structural.

Qualifications

- An associate's degree in Computer Aided Design, or a degree in Engineering, Construction Management, or Architecture, completion of Construction Management Certificate Program, or equivalent
- 3-6 years of experience in an A/E design firm setting or construction industry equivalency
- Proficiency in Revit is required
- Experience with AutoCAD P&ID and the functions of AutoCAD platforms (AutoCAD Architecture & MEP) preferred but not required
- Understanding of contractual delivery methods for design and construction projects
- Understanding of industry standard VDC documentation (BEP, BIMForum, etc.)
- Experience with 3D collaboration tools (Navisworks, BIM360 suite, Assemble) is preferred
- Knowledge of supporting BIM tools (Revit add-ins, Dynamo, Bluebeam, AR/VR) is preferred
- Industry BIM certification (Revit Certified Professional, CM-BIM, etc.) is preferred
- Proficient in Microsoft Office

Popis pracovní příležitosti

Join an award-winning company!

Toll Architecture, a national full-service Toll Brothers company, seeks a Building Information Modeling Job Captain to join our team at our office in Grapevine, Texas.

A BIM Job Captain must understand the business thoroughly, their primary function is to manage the process of virtually constructing a building and documenting the design contract documents accurately. This would encompass managing a team of production professionals, designers, and technicians of multiple disciplines and own the construction-documents set.

Responsibilities

- Leading the effort of putting together a set of construction documents
- Modeling Management and administration ensuring a healthy BIM database
- Coaching, mentoring, and supervising the process of virtually constructing
- Leading BIM Coordination Meetings: Spatial Coordination of Disciplines, gathering all disciplines
- Clash-detection tools on their own discipline to proactively build and design in a smart fashion

Don't miss this opportunity to join one of the nation's most respected companies!

2018 WORLD'S MOST ADMIRABLE COMPANIES LIST

#1 in Home Building Four Years in a Row

- FORTUNE magazine
 - A minimum of 5 to 7 years of experience working within Revit
 - Experience leading various projects is a plus
 - Associates degree or equivalent vocational or technical certification

We offer an excellent benefits package that includes comprehensive medical/dental, 401(k) with a company match, discounted stock purchase, discounts on mortgages, homes, appliances, and much more!

Come see why Toll Architecture has been attracting and retaining some of the best professionals in the industry!

Podat žádost

Popis pracovní příležitosti

Brown and Caldwell, a nationwide environmental engineering and construction firm, has an exciting opportunity for several Building Information Modeling (BIM) Interns. BIM is the process of developing a 3D model with embedded engineering data and calculations, and BC is looking to develop a library with complex computational BIM components. You will partner with our BIM experts to build out our computational 3D component library for water and wastewater treatment plant design projects. These positions can be located in our Denver, CO or Boise, ID office.

When you join Brown and Caldwell, you will enjoy a unique and welcoming culture. You will find that we offer a non-hierarchical, collaborative, and supportive environment, allowing you to do your best work. You will be trusted to do the right thing by our project managers and external clients and given the flexibility to manage your own schedule to achieve this. The work we do is interesting, challenging and wide-ranging in nature, and so is our client base.

Core Responsibilities

- Help to build and maintain a library of enterprise reusable BIM Content
- Build individual computational/parametric BIM components in Revit
- Create templates for typical Revit projects
- Create environmental engineering unit process components as a collection of nested parametric families in Revit

Desired Skills And Experience

- College student pursuing a degree in Engineering, Architecture, or equivalent
- Familiarity with Revit and/or Graphical Programming a plus but not required
- Passion for learning new things and diving into challenging problems
- Excellent communicator and solid interpersonal skills
- Ability to work both independently and cooperatively in a fast-paced environment
- Motivated self-starter and team player

Essential Criteria

Skills / Qualifications

- Hold a BSc, MSc, BEng, MEng, HND/HDC or be qualified by experience with an understanding and proven delivery of building or infrastructure schemes or managing multiple schemes in a sector
- A clear understanding of Building Information Modelling and its benefits to the construction Industry
- Have a good working knowledge of industry standards such as the PAS1192 suite, Uniclass, CIC BIM Protocol, COBie, IFC etc.
- 3D, 4D & 5D technical proficiency producing models, detecting clashes, extracting quantities, producing time linked simulations and interfacing with programs and cost plans
- Good IT skills and experience of multiple software platforms and variety of modelling packages and their interoperation.
- Competent in the use of Common Data Environments
- Practical experience working with advanced technologies to derive benefits to projects such as virtual and augmented reality, laser scans etc.
- Experience in the multi-disciplinary to design, specification and procurement of buildings and infrastructure.
- A passion for quality and continuous improvement with a focus on delivery.
- Excellent oral and written communication skills.
- Excellent organisational and time management skills.
- Proficiency in information gathering and technical discovery techniques.
- Strong teamwork / relationship management skills.

Desirable Requirements

- Appropriate BIM, CAD, Data, Project Management qualifications or certificates
- Strategic management and business change experience.

The successful candidate will be supporting project teams to create, implement, regularly review and deliver the Digital Strategy; Digital Execution plan, Digital Standards, Digital Procedures and Digital Methods for building and infrastructure projects across the region.

As a BIM Manager you will be working closely with stakeholders and engineers of all levels to be directly involved in a broad range of major projects, overseeing resourcing and staff development, inputting into bidding and delivering internal training. You should have the ability to make decisions, act on your own initiative and operate in a pro-active way. There are further opportunities within the organisation to contribute to the wider development of BIM initiatives through our Information Solutions Strategy.

The role will also be a client facing role to help our clients understand digital delivery and to response to bids, tenders and interviews.

Prime Responsibilities

- Practical application of BS/PAS 1192 principles and implementation of these to BAU.
- Developing and implementing BIM workflows and communicating the benefits of BIM within and outside the organisation
- Support, training, mentoring, & staff competency growth.
- Preparation of core technical BIM documentation and commercial bid proposals, (including EIR / BEP/ IDP/MIDP/TIDP etc).
- The digital delivery of multi-disciplinary models and information management from bid stage to project close out
- The delivery of digital outputs within project teams and the seamless sharing of information with other discipline teams, both internally and externally
- Ensuring technical quality through implementation of best practice and continuous improvement processes
- Project level management of the BIM Coordinators;
- Develop and maintaining excellent client relationships through successful project execution
- Providing advice to the regions as a source of technical expertise and leadership during the work winning & design & construction phases, supporting the development of project digital strategies, digital execution plans and stakeholder goals
- Enforcing and ensuring compliance with clients' BIM requirements, and BS/PAS 1192 standards throughout the project lifecycle
- Ensuring expectations of stakeholders are understood and are well managed.
- Engagement with stakeholders to identify core needs of the team and to help guide them towards improvements in Information Management.
- Interaction with clients, understanding and analysing their needs (requirements gathering) and advising on potential solutions.
- Assist in the maintenance and development of processes, procedures and systems.
- Monitor and pursue compliance with business processes, procedures and schedule.

There is a green lock icon indicating that the user must apply as one of the first applicants. At the bottom of the job card, there are two buttons: 'Uložit' (Save) and 'Podat žádost' (Apply).

Popis pracovní příležitosti

[Overview / Responsibilities](#)

It's a great time for you to join us.

Wood is growing its offices in Gloucester and Bristol on the back of significant opportunities in the nuclear new build and existing generation programmes. We are winning new contracts and want you to join our team. We are a professional, friendly and supportive team, who can offer exciting development opportunities across a range of projects. The south west of England is dynamic and thriving environment in which to take your next step in your career.

We're looking for people

Who have experience or transferrable skills into the nuclear industry or other highly-regulated industries. Whether you're beginning your career or already operating at a senior level, we'd like to meet with you and discuss the exciting opportunities on offer.

We are a people business

People are at the heart of Woods business. We work together to deliver the best outcomes for our customers and we're united by our values of Care, Commitment and Courage. As we as aspiring tto technical excellence we are passionate about diversity and inclusion: we are members of Women in Science and Engineering (WISE), have signed up to the Armed Forces Covenant and have Mental Health Champions in all our nuclear offices. We also have a technical support network in the nuclear business, through the Head of Profession network. This enables planned progression and support to undertake roles aligned to the current and future nuclear generation assets.

Wood are currently seeking a BIM Interface Manager/ Information Management Consultant.

The successful candidate will be supporting project teams to create, implement, regularly review and deliver the Digital Strategy; Digital Execution plan, Digital Standards, Digital Procedures and Digital Methods for building and infrastructure projects across the region.

Popis pracovní příležitosti

A leading infrastructure contractor require a BIM/Digital Engineer to join their HS2 team.

Main Purpose Of Role

- Support company in deliver structured asset information, GIS data and graphical models to and other relevant stakeholders in accordance with the principles of the W1800 - Employers Information Requirements.
- Provide guidance and support to design partners and the supply chain to ensure that 3D models produced as part of the design process will be suitable for use for multiple purposes including issue resolution, quantification, programme sequence visualisation, offsite manufacturing and on site installation tracking.
- Upskilling the project team to utilise Digital Engineering tools, including 3D models and GIS and to go about their work more efficiently utilising different sources of data to enable better decisions to be made.
- Manage the assurance of GIS data to ensure that any data received is to the standards required by overall client
- Seek new innovations and new ways of working to help ensure the project team and associated stakeholders are working more efficiently and with higher quality outputs than they were previously.

Key Responsibilities And Duties

- Ensure that Digital Engineering objectives are included within work package briefs and that the delivery team are aware of what is required/expected.
- Ensure that Digital Engineering deliverables are made on time and to the correct standard for required work packages.
- Upskilling of designated project staff associated with their work packages to utilise Digital Engineering tools and materials as part of the way they go to work.
- Engagement with the supply chain to ensure they are aware of what is expected from them and putting into place agreed plans of action where gaps exist.
- Leading training sessions in software training for small to medium groups of people.
- Ensuring that all CAD, Asset Data and GIS data is assured prior to submittal to HS2
- Engineering team and wider project team as appropriate.

This is a unique opportunity to work on the largest infrastructure project in the UK and have your Digital/BIM career developed to its potential

BIM Engineer

Silman · New York, New York

Zveřejněno před 2 týdny · 812 zobrazení

[Uložit](#) [Podat žádost](#)

Popis pracovní příležitosti

Silman is a highly productive professional engineering firm looking for a Structural BIM Engineer to join its team. The successful candidate will contribute to exciting and high-profile projects with renowned architectural clients and design professionals and will demonstrate communication, BIM technology and engineering skills. The successful candidate should understand engineering techniques, the rationale behind design decisions, and their application through BIM processes.

Responsibilities

- Create 3D models for use in analysis and documentation
- Document and annotate 2D plans, sections, and details generated from 3D models
- Coordinate models and workflow between members of the design team
- Contribute to project-specific QA/QC efforts
- Perform basic engineering analysis and design functions
- Work as a member of BIM and Engineering teams, reporting to an Engineering Studio Leader

Requirements

- Bachelor's Degree in Structural/Civil/Architectural Engineering
- Minimum 1 year of work-related experience or specialized training in Autodesk Revit
- Working knowledge of current Autodesk Revit software
- Strong written and verbal communication skills
- Ability to read and understand engineering and architectural drawings
- Familiarity with engineering analysis and design software such as RISA, SAP2000, and RAM Structural System
- Knowledge of other products in the Autodesk portfolio (Navisworks, 3ds Max) is beneficial but not required
- Knowledge of other modeling products (AECOSim, Rhino) is beneficial but not required
- Knowledge of AutoCAD is beneficial but not required

Please send your resume and cover letter to resume@silman.com

Silman is an equal opportunity (EOE) and affirmative action employer. We welcome qualified applicants regardless of their race, sex, age, color, religion, marital status, veteran's status, ancestry, national origin, citizenship, disability, or any other characteristic protected by local, state or federal laws, rules or regulations

Obrázek 43 Senior Revit / BIM Draftsman; zdroj: linkedin.com

The screenshot shows a LinkedIn job listing. On the left is the Arthur Rutenberg Homes logo. The job title is 'Senior Revit / BIM Draftsman' at 'Arthur Rutenberg Homes · Indianapolis, IN, US'. It is a full-time position, posted 3 weeks ago, with 10 views. There are two buttons: 'Uložit' (Save) and 'Snadná žádost' (Easy Apply). A green clock icon indicates 'Podějte žádost jako jeden z prvních' (Apply as one of the first).

Popis pracovní příležitosti

Arthur Rutenberg Homes, a legendary leader in residential design, has a wonderful opportunity for an experienced Revit/BIM Draftsman to join our nationally recognized Design Department in Indianapolis, Indiana. We seek a detail oriented individual that can produce full sets of working drawings.

Skills & Responsibilities

- This position is ideal for someone that has a strong background in residential drafting, and can understand and solve design issues including roof layouts.
- Excellent verbal and written communication skills with your team and across departments, along with your strong work ethic, make you a great team player.
- The successful candidate will be knowledgeable in Midwest frame construction and architecture, and have a background which demonstrates an understanding of the home building process.
- This individual thrives in high-pressure situations and tight deadlines, and your self initiative and collaboration skills allow you to meet company goals and project deadlines with the ability to manage multiple projects simultaneously.
- Professional development, along with the potential to expand your drafting ability under the guidance of top designers, is an exciting opportunity for this candidate.

Education & Qualifications

- 3-5 years of high end residential experience is required.
- Must be proficient in Revit 2015 or later.
- Knowledge of building codes and construction detailing.
- Familiarity with 3D modeling.
- Experience with Microsoft Office Suite is preferred.
- Please submit your resume when applying.
- This is a full time, 8:00am to 5:00pm corporate position located at our Indiana office.

Arthur Rutenberg Homes has been in business for over 35 years, with many of our first employees still a part of our expanding family. We offer medical, dental, 401(k), vision, life insurance, and profit sharing. If this position sounds like the next step in your career, then this is the job for you!

Arthur Rutenberg has been a respected name in home building since 1953, when he built his first home upon the four cornerstones that would make him legendary: design, craftsmanship, service and responsibility.
